Care & maintenance guide

TEXTILE

For information regarding the care and maintenance of your chosen textile, please refer to the specific guidelines provided by the fabric supplier. We upholster with the textile you select, but we strongly recommend following the supplier's care instructions to ensure the best performance and longevity of the fabric.

GENERAL CARE

For non-greasy stains, gently dab the area with a lint-free cloth or sponge wrung out in lukewarm water. If necessary, clean by dabbing with soapy water, followed by clean water. Finish by absorbing moisture with a clean, non-dyeing dish towel, and use a hairdryer to dry the area.

LEATHER

For information regarding the care and maintenance of your leather upholstery, please refer to the specific guidelines provided by the leather supplier. Leather is a natural material, and we recommend following the supplier's care instructions to ensure the best performance and longevity of your furniture.

GENERAL CARE

To maintain the appearance of your leather furniture, avoid placing it in direct sunlight or extreme heat. Absorb spills immediately using a clean, dry cloth. Regularly dust the leather with a vacuum cleaner using a soft brush attachment. For further instructions, please refer to the supplier's website.

SHEEPSKIN

For information regarding the care and maintenance of your sheepskin upholstery, please refer to the specific guidelines provided by the sheepskin supplier. Sheepskin is a natural material with unique properties, and we recommend following the supplier's care instructions to preserve its appearance and longevity.

GENERAL CARE

To maintain your sheepskin furniture, vacuum it regularly and air it to keep it fresh. Any spills should be soaked up with water immediately. Clean the area with a sponge, lukewarm water, and a mild wool shampoo. Avoid placing sheepskin in direct sunlight, as color changes may occur.

WOOD

**NATURAL OILED WOOD**  
To clean, simply wipe with a soft cloth using lukewarm water. Avoid the use of chemical cleaners. The wood is treated with natural oil. Secondary treatment with oil counteracts drying of the wood and regular application is recommended.

**BLACK LACQUERED WOOD**  
To clean, simply wipe with a soft cloth using lukewarm water.

LAVA STONE

To clean simply wipe with a soft cloth using lukewarm water. Avoid the use of chemical cleaners.

ALUMINIUM

To clean, simply wipe with a soft cloth using lukewarm water. Avoid the use of chemical cleaners.

BRASS

The solid aluminum ring has been polished. The solid black steel ring has been oxidized to give it the satin look. The rings should only be polished with a wringed clean cloth with lukewarm water

SAND BLASTED STEEL

To clean, use lukewarm water mixed with one drop of olive oil. Do not use any cleaners or other products than olive oil and do not use any other objects than a soft cloth.

If there are marks, rings, or other stains from spilled liquids on Pair Sandblasted surfaces, only on Pair Sandblasted tabletops, it is recommended to use a descaling solution with a pH value of approximately 2.3.

- Spread the descaling solution evenly over the entire tabletop surface and let it sit for about 10 minutes.
- Wipe the surface with a dry napkin or cloth.
- If marks from other liquids remain, repeat the treatment.
- Afterward, thoroughly wipe off the descaling solution from the surface. Then, use a clean, damp cloth to wipe the table multiple times.
- Dry the tabletop again with a dry cloth to ensure the surface is completely dry.
- Apply a clear baby oil with a clean cloth over the entire surface and wipe off any excess oil with another clean cloth.
